

## What is The Transportation Museum?

The Transportation Museum is an annual, one-day event featuring interactive and educational exhibits and activities related to transportation. The museum is created by Sequoia High School student Andrew Mancini, who began the museum at the age of five, and is held every fall at a local school in San Carlos. Each year, visitors enjoy a variety of new exhibits that present relevant topics in interesting, hands-on formats. Past exhibits have ranged from what it's like to travel in space—complete with taste-testing of “astronaut” ice cream—to the history of the Pony Express, and everything in between. Other transportation enthusiasts are invited to display their interests and research at the museum, which you'll be treated to at the museum.

To learn more about the museum, its history and past exhibits, view photos from this event, and sign up to make sure you find out about the 13<sup>th</sup> Annual Transportation Museum in 2021, visit [TheTransportationMuseum.com](http://TheTransportationMuseum.com).

I hope you enjoy the museum!     - *Andrew*

# The 12<sup>th</sup> Annual Transportation Museum

## Visitor's Guide

**Sunday, October 27, 2019**

**10:00 a.m. – 3:00 p.m.**

**Brittan Acres Elementary School, San Carlos, CA**

# Exciting exhibits and activities for all ages! Here's what to check out...

## Can't Miss Attractions:

- **150 Years Overland by Rail: The Legacy of the Transcontinental Railroad**—Explore the impacts of the railroad on American society, 150 years after driving in the golden spike at Promontory Point.
- **Air Traffic Control Escape Room**—You're in charge of turning on the runway lights to allow an airplane to land...but what's the combination? Hurry before the storm hits!
- **Transit Virtual Reality**—Tour 4 railways around the world in virtual reality.
- **SamTrans Remote-Controlled Bus Obstacle Course**—Take control of your very own SamTrans bus, driving along a route, stopping at bus stops, and practicing your turning skills. How fast can you go?
- **It Takes A Transit Village**—After learning the advantages and disadvantages of transit-oriented development, build your own transit village out of LEGOs!
- **Guest Exhibitors**—Pilot your own airplane across the country with student pilot Brandan D., discover solutions to Bay Area traffic, and learn about upcoming projects from the California High-Speed Rail Authority, Metropolitan Transportation Commission, and SamTrans.
- **...and more!** Enjoy the museum's realistic bus-driving simulator, an extreme Connect Four game, a photo booth, traversing the world's most extreme airports, and more.
